Crop Conditions Affecting Corn Goes to 70 Cents and Corn Have Depressing Influence on Market.

NOTE—All market news on this page reflects closing sale or prices (unless buy or bid be specified) Monday, August 4.

New York, Aug. 4.—Crop conditions, especially these alferting corn, exerted more influence over today's dull market than any factor in the stock market itself. Little relief from drouth was reported from the corn belts and options again rose excitedly. Analysis of later conditions respecting cord, however, indicate that most of the damage has been in states which show substantial carry-over from last year. Dealings in stocks were exceedingly light and enlisted no outside interest. Leading lesues were practically unchanged. New low records were made by United States Express and Loose, Wiles Biscuit first preferred, the latter losing six points.

Wiles Biscult first preferred, the latter losing six points.

Bonds were steady,

Further, improvement was shown by the list in the later dealings, when many prominent issues averaged a point or thereabouts above the lowest prices of the morning. The demand was so limited, however, as to leave little doubt of its professional origin.

leave little doubt of its professional origin.

Dealings in stocks to noon were barely more than 59,000 shares, while bond sales for the same period scarcely aggregated \$230,000. A better tone for the general list was manifested in the early afternoon, except for American Express, which fell 12% points to its lowest price in five years.

The market closed strong. The final hour brought a considerable dagree of activity and best prices of the day. Virtually all the important stocks were up from 1 to 14 points, while Erie first preferred showed a gain of two points.

Keeps on Rising-Other Grains Advance.

Chicago, Ill., Aug. 4.—Whether cork vould go above 70 cents a bushel was exiled today in the first minute. The narket shot up to that level in the market shot up to that level in the very first trade and soon was beyond. Edouth already the most severe in 10 years, is predicted to continue all the present week, arcording to the government forecast. As a result, the volume of buying today took on huge proportions. The opening was % to 11% higher than Saturday night's close. September, which started at 70 to 73%, a gain of % to 1 cent, rose to 71% in almost a vertical line.

The close was weak with September 16.5% net lower at 87%.

Other grain bulged with corn. Whoat was also affected bullishly by unfavorable harvest reports from southeastern Europe and by diminishing receipts in the American northwest. September opened a shade to 16.4% cents higher at 88% to 88% and rose to 39 cents. The close was nervous with September at 69% to 69%, the same as Saturday pight to % cent higher.

September outs started % to 11% up at 43 to 40% and steaded around 42%. Provisions showed much irregularity. Corn scarcity tended to make distant options firm, but led to semi-panicky weakness in nearby deliveries, especially September pork, which dropped 60 cents to 20.30. First sales on the market as a whole varied from 37% off to 17% advance, with September as follows.

Pork 205% to 2060: lard 1146 to 1147%; ribs, 1137% to 1142%.
